- 1) Claims 21 and 28 are pending in the instant application.
- 2) Any objection or rejection of record that is not expressly repeated in this action has been overcome by Applicant's response and withdrawn.
- 3) The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 4) Claims 28 would be allowable if it were directed to "an isolated and purified polypeptide consisting of **the** amino acid sequence of SEQ ID NO:37."
- 5) The drawings in the instant application still do not comply with 37 C.F.R. § 1.821(d), which requires a reference to a particular sequence identifier (SEQ ID NO:) be made in the specification and claims wherever a reference is made to that sequence. M.P.E.P. 2422.02 expressly states that "when a sequence is presented in a drawing, regardless of the format or the manner of presentation of that sequence in the drawing, the sequence must still be included in the Sequence Listing and the sequence identifier ("SEQ ID NO:X") must be used, either in the drawing or in the Brief Description of the Drawings". Figure 5 of the instant application presents three different amino acid sequences without employing sequence identifiers to describe those sequences. Correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 6) Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This claim is vague and indefinite in so far as it

employs the closed limitation "consisting of" in conjunction with the open limitation "an amino acid sequence of SEQ ID NO:37". It is unclear if the claimed polypeptide is required to consist of the entire amino acid sequence referred to therein or if it encompasses a polypeptide consisting of just a portion of that sequence.

7 & 8) Claim 21 stands rejected under 35 U.S.C. 102(a) as being clearly anticipated by the Ema et al. publication (BIOCHEM. BIOPHYS. RES. COMM. 184(1):246-253, 15 Apr. 1992) and under 35 U.S.C. 102(b) as being clearly anticipated by the Bradfield et al. publication (MOLECULAR PHARMACOLOGY 39(1):13-19, 1991) for those reasons of record in section "5 & 6" of Paper Number 29.

Applicant appears to traverse this rejection on the premise that the sequences of the prior art proteins are greater than 72 amino acids in length whereas SEQID NO:37 is not. As stated earlier, the amino acid sequence of the isolated and purified Ah receptor of Ema et al. certainly **comprises** the entire amino acid sequence presented in SEQ ID NO:37 of the instant application and, therefore, expressly meets all of the limitations of claim 21.

Applicant's traversal of this rejection as it relates to the Bradfield et al. publication completely ignores the principal of inherency outlined in M.P.E.P. 2112. As stated in the previous office action, the facts of record support the conclusion that the Ah receptor protein of Bradfield et al. is the same protein that is described in the Ema et al. publication and, therefore, that isolated and purified protein also meets all of the limitations of claim 21 either explicitly or inherently.

9) Applicant's arguments filed 09 February of 2004 have been fully considered but they are not persuasive.

10) **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
